BULLETIN  
OF THE  
UNIVERSITY OF UTAH  
SALT LAKE CITY, UTAH

DEPARTMENT OF MILITARY SCIENCE  
AND TACTICS

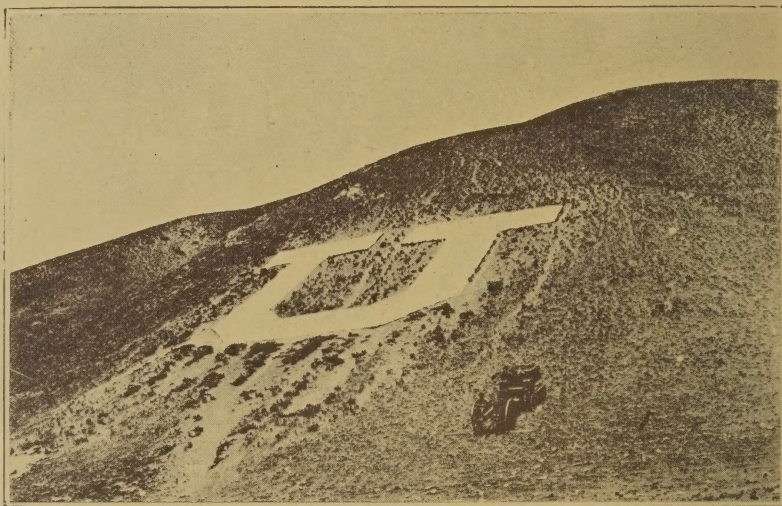

PUBLISHED MONTHLY BY THE UNIVERSITY OF UTAH-SALT LAKE CITY

## R. O. T. C. at the University of Utah

**T**HE recent World War has taught the imperative need for a large number of trained officers in the United States Army, and in order to meet any future emergency the War Department has established in many of the larger colleges and universities throughout the United States, Reserve Officers' Training Corps, and the University of Utah has requested and has been designated by the War Department as one of the institutions at which this training will be offered.

The course will cover a period of four years, and has for its object the qualifying of college men to become officers of the United States Army in time of war. A student completing the course satisfactorily will be offered by the President of the United States a commission as a Second Lieutenant, United States Reserve Corps. The course at this university is **ELECTIVE** and a student may have the choice of training in the field artillery arm or the infantry arm; and to efficiently carry on

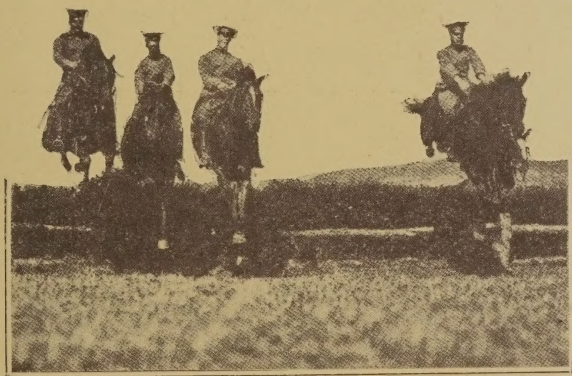

3-inch Field Gun and Artillery Tractor at the Big "U" on the Wasatch

this instruction, the War Department has detailed to the University five field artillery officers and one infantry officer of experience, as well as a number of non-commissioned officers. The work throughout the college year will be almost entirely theoretical in the class rooms, the practical work being only enough to illustrate and to better bring out the theory.

#### PHYSICAL TRAINING FEATURED.

Physical training is required throughout the academic year, this training to consist of calisthenics, gymnastics, swimming, fencing, athletics, equitation and horsemanship... One summer camp of six weeks' duration will be required during the four years, and at this camp the practical application of the theoretical work had in the class room will be the all important thing. This camp will be of no financial expense to the student.

Over Clean

Three hours a week is required for theoretical work, and the University gives the same credit for the course in Military Science and Tactics as is given for the other elective courses. The subjects of study that will come under the field artillery training will be as follows:

Ordnance and Gunnery.

Administration.

The Field Artillery Horse, Gas Engines, Trucks and Tractors.

Military Law.

Mapping.

Conduct of Fire.

Minor Tactics and Map Maneuvers.

Military History and Policy of the United States.

Principles of Military Strategy.

Equitation and Horsemanship.

Physical Training in its Varied Forms.

Practical Instruction at Summer Camp.

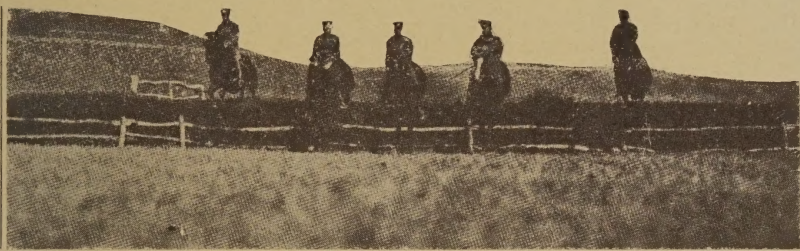

The War Department has already sent to the University field guns of different calibers, artillery harness and saddle equipment, tractors, fire control instruments, mapping equipment, and complete telephone and radio equipment.

The course will be so varied and flexible as to make it not only of educational value to the student, but also interesting, and will give him a great deal of aid in other courses that he may be pursuing. This is particularly true of the student who elects an Engineering course.

A Gun Squad in Action

In Fine Fettle

### SADDLE AND DRAFT HORSES.

Arrangements are being made for stabling and caring for the draft and saddle horses that will be used, and the equitation and artillery driving will no doubt be one of the attractive, interesting and health-building features of the course. The study of the gasoline artillery tractor, four of which are now on the ground, as well as of trucks as applied to artillery transportation, will also be of invaluable use to the student.

### EQUIPMENT FOR MEN.

The following is what the Government offers to members of the R. O. T. C.:

Each man will receive:

(Actual cost value)

1 coat wool O. D. ....	\$ 9.79
1 breeches wool O. D. ....	6.32
1 shoes russet or marching	4.65
1 shirt wool O. D. ....	3.50
1 overcoat O. D. short.....	13.56
1 leggins pair canvas.....	1.05
1 hat service .....	2.00
2 collar ornaments .....	.07
1 hat cord .....	.09
1 belt .....	.23
chevrons .....	.57

Per year .....\$41.83

Additional for those attending  
summer camps:

2 breeches cotton O. D.....	\$ 3.38
1 shoes russet or marching	4.65
1 shirt wool O. D. ....	3.50
1 leggins pair canvas .....	1.05
1 hat additional .....	2.00
1 hat cord .....	.09

\$14.67

Each man will receive in four years, property valued at 4 x \$41.83 .....	\$167.32
Each man will receive in three summers property valued at 3 x \$14.67 .....	44.01
Each man recommended will receive commutation of subsistence, two years, or 590 days, @ 40c per day .....	236.00
Each man may receive commutation of subsistence in kind (not paid in cash) three summers, 135 days, @ 40c per day.....	54.00
Transportation average 1000 miles per summer, or 3000 miles for three summers, at 4c .....	120.00
	<hr/> \$621.33
Average for each of the four years in university course.....	\$155.33
Besides the items mentioned above, equipment issued for each student amounts to at least .....	\$ 50.00

The privilege of buying extra uniform at the above mentioned prices from the Quartermaster Dept., which will have an additional saving value to those who take advantage of it.

The privilege of special technical training in various fields without any tuition charges.

An opportunity to obtain a commission as second lieutenant of the Regular Army for a period not exceeding six months, with allowances for that grade, and with pay at the rate of \$100.00 per month.

Uncle Sam Can Go Anywhere

## STUDENTS NOT MEMBERS OF ARMY.

It must be understood that a student taking the R. O. T. C. course is in no way a member of the United States Army, and is on exactly the same status as any other student in attendance at the University, with the exception that he is drawing pay for pursuing this course during his junior and senior year.

The Infantry course will comprise such studies as will equip a student to become an efficient officer in the Infantry arm of the United States Reserve Corps.

Students will not be required to wear uniforms in class rooms or on the campus, except for equitation, nor will military formations be required. The wearing of uniforms and the military formation will be restricted to summer encampments.

Further and more minute details may be had by applying to the Registrar, University of Utah.

---

### Instructors of Department of Military Science and Tactics

#### INFANTRY:

Lt. Col. WALTER MOORE, Infantry, U. S. Army.

#### FIELD ARTILLERY:

Col. MARSHALL G. RANDOL, Field Artillery, U. S. Army.

Capt. HENRY B. DAWSON, Field Artillery, U. S. Army.

Capt. WM. A. CAMPBELL, Field Artillery, U. S. Army.

Capt. JOHN A. SMITH, JR., Field Artillery, U. S. Army.

2nd Lt. BRANDON SMITH, Field Artillery, U. S. Army.
